

Austin Wiley

5974 S. Fairfield St., Littleton, Colorado 80120 — 303.905.7293 — austinwiley84@gmail.com

Objective

Skilled full stack developer with experience in web server development and deployment. Dedicated to improving the development methods used to create new software programs. Thanks to years of working in cross-functional teams and running my own business, I'm great at coming up with solutions, no matter what you throw at me.

Education

FULL STACK WEB DEVELOPMENT BOOTCAMP

APRIL 2019 — UNIVERSITY OF DENVER, DENVER, CO

An intensive 24-week long boot camp dedicated to designing and building web applications.

Skills & Abilities

- Node.js
- Express.js
- React / React Native
- JavaScript (ES6)
- Auth0 (Authentication)
- jQuery
- HTML5 / CSS3
- Bulma
- Bootstrap
- Materialize
- Handlebars.js
- Moment.js
- NPM
- Git
- Bash
- Heroku
- Docker
- AWS
- Python
- MongoDB
- Mongoose-ODM
- MySQL
- Sequelize-ORM
- Firebase

Applications Built

GETTING THERE GUIDE APP

Worked as part of a small consulting team to develop a React Native (iOS and Android) mobile app for specialized transportation services in the Denver metro area serving persons with disabilities and the elderly.

IOT (INTERNET OF THINGS) TEMPERATURE CONTROLLER

Designed, developed, installed and maintained a remote temperature controller for monitoring and setting brewing equipment temperatures.

HYPERLOCAL

Collaborated with a small team to create a backend API as well as front end user authentication and UI components for a web-based app. The app, Hyperlocal, is a forum for fostering real world connections through shared interests while stimulating community interaction.

BEERKAN

Designed and built full stack solution for the professional brewer and avid homebrewer that works like a Kanban Board for tracking beer throughout the brewing process. BeerKan is a digital Brew log allowing the user to track each batch of beer from raw ingredients to keg. The web-based software allows the brewer to be more efficient, brew more beer and archive all brew logs.

Experience

DEVELOPER — DIGITAL PIXEL (LITTLETON, CO)

NOVEMBER 2019 ~ PRESENT

- Develops and builds both React and React-native applications based on client requirements.
- Performs coding, debugging, testing and troubleshooting throughout the application development process utilizing Jira and Bitbucket for project management.
